### Confirmation for road marking durability test at BAST's wear simulator, BAST-identification-number 2013 1DW 07.09

The type I-road marking system consisting of a 2 component dispersion with the BAST test number 2013 1DW 07.09 was tested according to test specifications of DIN EN 13 197 (Issue December 2012) up to traffic class **P 7** (4,0 million wheel passages) and fulfills the minimum requirements of DIN EN 1436 (Issue January 2009) concerning the traffic – related properties of wear resistance and skid resistance.

System name: **StreetCoat Part A + B**  
Material name: **StreetCoat 2 Komponenten, Pattern Paving Products**  
Layer thickness: **1.600 µm**  
Mixed-in additives: **Anti-skid material**  
Drop on glass beads: **no**  
Kind of application: **rolled up**

Properties	Amount of wheel passages [mio]								
	0	0,01	0,1	0,2	0,5	1,0	2,0	3,0	4,0
Wear resistance [%]	100	100	100	100	100	100	100	100	100
Skid resistance [SRT-units]	85	66	67	68	67	66	65	66	67
